

RX-100PC™

Now with MediaRipper

Automated Ripping & Burning Solution. Rip your CD Collection and import to your iPod with ease, or burn up to a 100 copies of your favorite digital audio tracks with our Audiophile software. Simply load up to 100 of your favorite music CDs and rip, or load up to 100 blank CDs and compile your track list and burn away! Even make up to 100 copies of your latest DVD project.

How does it all work?

The RX-100PC features a reliable disc autoloading system designed to automatically load and unload the RX-100PC's CD/DVD drive. By automating the disc handling you are able to automate tasks such as disc ripping. The MediaRipper software integrates with Windows Media Player (11+) to provide a fully automated audio CD ripping solution. Configure Windows Media Player once, then launch MediaRipper and click **Start Ripping** to begin converting your entire CD library to digital audio files stored on your computer. Once ripped these files can be easily imported into your iTunes library with a simple click.

Rip to Multiple Formats.

Windows Media Player supports multiple audio formats for saving your Ripped files:

- Windows Media Audio
- Windows Media Audio Pro
- Windows Media Audio (Variable Bit Rate)
- Windows Media Audio (Lossless)
- MP3
- WAV (Lossless)

Auto-name Albums, Tracks, Genres, etc

Using the built in features of Windows Media Player your ripped files will be saved to an Album Folder, and each track will be named automatically using the track names from the album. Additional media information such as Artist, Genre, Composer, Length, Date, and more are automatically embedded within each ripped track. This means your tracks can be easily organized and managed by your portable music player.

More than just a Ripping Station.

When you're not ripping your CD Library you can use the RX-100PC to backup important files on your computer with Dexpreso BackupKit, or make copies of any data CD or DVD with Dexpreso BurningKit, or burn copies of audio compilations with Dexpreso Audiophile. The RX-100PC is also packed with advanced features such as .ISO image creation and burning, as well as disc spanning for backing up very large files. The RX-100PC is designed to meet all your Media Production needs.

Quickly Load your iPod.

Let the RX-100PC with MediaRipper work over night to rip your CD library to your computer and then simply import the ripped albums into iTunes using the "Add Folder To Library" option. iTunes will convert the files to AAC so they can be used with your iPod. Add all your new music folders and and then sync with your iPod.

Recordex USA, Inc.
10-50 46th Avenue
Long Island City, NY 11101
